For Sensitive Pets (prone to GI upset)

Similase Sensitive Stomach (Gastric Complex)

PROVIDES GENTLE SUPPORT FOR GI TRACT*

Clinician-developed Similase Sensitive Stomach combines Microbial Enzymes with the demulcent herbs marshmallow and slippery elm to provide gentle support for the GI tract.

Gamma-oryzanol and licorice root complement the demulcent herbs.* Protease is omitted due to its potential for irritation in sensitive patients.

Slippery Elm 400mg capsules or powder

Slippery elm, also known as red elm, moose elm, or Indian elm, is a small North American tree that has been traditionally used by herbalists for over 100 years. It was reportedly used by native North Americans and early settlers as a survival food. Its bark is known for its mucilage constituents, which can help to coat and soothe the tissues of the GI tract.

Standard Process Canine Enteric Support

create account with Patient Direct code GNM9D9

A healthy digestive tract is critical to overall health and well-being. In addition to breakdown and absorption of nutrients, digestive health can also have a significant impact on other body systems (immune system, liver, bone marrow, or adrenal glands).

Canine Enteric Support contains a variety of functional foods, both plant and animal, that "feed" the various components of the digestive system to provide general digestive system support and support the ability of intestinal cells to function, regenerate, and respond to daily metabolic and immune challenges

Rx Vitamins Rx Clay

If you're looking for a supplement that might work to keep your pet's gastrointestinal tract healthy, Rx Clay Powder by Rx Vitamins for Pets may be right for you and your furry friend. Specifically, Rx Clay Powder contains hydrated calcium aluminum silicate, which is a natural substance that may be able to adhere to bacterial enterotoxins to help remove them from the GI tract. As a result, this product may help address certain symptoms related to mild diarrhea, such as loose stools. Since this Rx Vitamins for Pets supplement might work to restore the intestinal mucosal barrier, it may also play a role in relieving minor inflammation or vomiting associated with leaky gut syndrome.

[Buy Now](#)

RX Vitamins Nutrigest

NutriGest for Dogs & Cats Powder by Rx Vitamins for Pets is comprised of a blend of ingredients that might work to promote canine and feline digestive health. First, every serving of NutriGest for Dogs & Cats Powder contains six strains of probiotic bacteria. Notably, probiotics are good bacteria that might aid in digestion by working to maintain a balance of gut flora. As a result, this powdered supplement may help address some signs of gastrointestinal discomfort, such as mild diarrhea, vomiting, or gas. In addition, this Rx Vitamins for Pets supplement provides several herbs that could potentially work to maintain optimal digestive function, including ginger, cat's claw, and Oregon grape root.

Probiotics

Dr Mercola Complete Probiotics

Complete Probiotics for Pets provides your cat or dog with 38 billion CFU beneficial bacteria from 14 carefully selected strains known to promote optimal gastrointestinal health in pets. These health-promoting strains survive stomach acid to reach their small intestine, unlike some acidophilus-based products.

FidoSpore

FidoSpore is the first probiotic supplement clinically shown to support digestive health and reduce leaky gut in dogs. FidoSpore contains a unique blend of *Bacillus subtilis* HU58, *Bacillus licheniformis* (SL-307), and *Pediococcus acidilactii* mixed with irresistible defatted, grass-fed beef liver for flavor and aroma. In fact, a recent study exploring gut dysbiosis in dogs found that FidoSpore dramatically reduced inflammation, diarrhea, and vomiting in as little as 30 days.

Four Leaf Rover Probiotics

PROTECT is formulated with ingredients that help support your dog's brain and immune system. It can be used daily and is rich in Soil-Based Probiotics.

These probiotics have proven to be robust species that can easily survive changes in pH and temperature levels (unlike traditional probiotics). This means they can better colonize and fulfill health benefits.

Digestive Enzymes

Dr Mercola Digestive Enzymes

Digestive Enzymes for Pets to include cat- and dog-friendly enzymes to aid in the digestion of proteins, fats and carbohydrates. This complete formula includes betaine HCl, bromelain from pineapple, papain from papaya, and pancreatin, a blend of three animal-based pancreatic enzymes. Animal-sourced enzymes offer many advantages over fungal- or plant-based enzymes for cats and dogs: They most closely mimic what you find in the ancestral animal's prey's GI tract.

Detoxification Support

Chlorophyll

dose is 100mg/10lbs per day

Chlorophyll is a green pigment naturally produced by plants and algae and gives them their characteristic green color. Chlorophyll is critical for photosynthesis, the process by which sunlight is converted into chemical energy. Chlorophyll can function as a free radical neutralizer, may help to support the body's detoxification processes and has been traditionally used as an internal deodorizer.
